## IN-HOME SLEEP TESTING

In-Home sleep testing is available through the use of a portable computer monitoring device that measures heart rate, oxygen saturation and analyzes breathing patterns throughout the night. Patient wears the monitoring device for 1-2 nights.

- Patient preferred testing
- Conveniently done in patient's home
- Minimal equipment for easier sleep
- More affordable than traditional In-Lab testing

## IN-LAB SLEEP TESTING

In-Lab sleep testing performed at the State-of-the-Art ProHealth Care Sleep Lab Center conveniently located in Delafield.

- More comprehensive diagnostic capabilities; gold standard
- Monitored by a sleep technologist in a controlled sleep environment
- Recommended for patients who suffer from cardiac disease, neurological illness, restless leg syndrome, suspected narcolepsy
- Can be followed by next day sleep testing (MSLT)

## NWC Physicians will:

Provide comprehensive Evaluations for patients suffering from extreme tiredness, Insomnia, abnormal behaviors while sleeping and snoring/breathing issues.

Will determine most appropriate treatments and further testing when indicated for sleep disorders.

Setup/interpret Home Sleep Testing.

Comprehensive sleep testing at nationally accredited Delafield ProHealth Care Sleep Lab.

Expedite and manage CPAP therapy in our CPAP clinic with Board Certified Sleep MD and Respiratory/Sleep Therapist.

Use state of the art electronic medical record software (EPIC) to generate reports and communicate with patient's primary doctor.

Verify medical benefits, obtain insurance authorizations and provide prompt CPAP setups.

Work closely with DOT doctors to ensure safety of individuals requiring a CDL license. We understand the importance of prompt evaluations and initiation of therapy to avoid interruption of driver work schedules.
